247-248, 259
WHS, WS2
OS SM "A"

Abstract: The Allis-Chalmers Company's Milwaukee roots go back to 1860 when Edward P. Allis purchased the Reliance Works and began producing steam engines and other mill equipment. Allis died in 1889, but the company continued to prosper under the direction of his sons Charles and William. By 1900, the firm was one of America's largest steam engine builders. In 1901, the Edward P. Allis Company merged with Fraser & Chalmers (mining and ore milling equipment), the Gates Iron Works (rock and cement milling equipment), and the industrial business line of the Dickson Manufacturing Company (engines and compressors) to form the Allis-Chalmers Company. The company's headquarters was relocated to the newly developed community of West Allis. It was reorganized in 1912 as the Allis-Chalmers Manufacturing Company. The firm's diversified business lines included agricultural equipment, construction equipment, power generation and power transmission equipment, and machinery for use in industrial settings. During World War II, the company was a key contributor to the Manhattan Project that developed the atomic bomb. By the 1980s the company struggled and sold off several of its business lines. Its Milwaukee offices closed in 1999

Scope and Content: The collection includes photos, internal and external company publications, product literature, reports, memos, blues, patents, and biographical/historical information regarding the Allis-Chalmers Company and its employees.

Restrictions on Access: No restrictions

Language: English

Arrangement: The collection is divided into the following 15 series and organized alphabetically within each series:

- 1) Corporate: Contains material from the corporate side of A-C. Contains proceedings from the White Consolidated legal battle the 1960s, as well as material from the WWII era concerning employees. Also contains employment rolls from the Edward P. Allis & Co. Reliance Works, as well as a large section concerning A-C and labor relations.
- 2) Related Companies and Subsidiaries: Contains material from companies within A-C that were wholly owned, as well as companies purchased by A-C, such as Gleaner-Harvester Corp., S. Morgan Smith, Bullock Electrical Manufacturing Co. and Simplicity, to name a few.
- 3) Biographical: Contains biographical material of the presidents of A-C, as well as board members and managers in the 1970s and 1980s.
- 4) Plants: Contains information about individual plants owned and operated by A-C throughout the world.

- 5) Publications: Some loose external and internal publications of A-C. (See bound copies near end of finding aid)
- 6) Publications, Bulletins, Product Literature: Various magazines, catalogs, bulletins, product literature and other publications. These items are all loose on the shelves.
- 7) Divisions: Contains information about divisions within A-C, which were specifically named as divisions on material within the folders.
- 8) Products: The most far reaching of the series, contained is information concerning products produced by A-C, Edward Allis & Co., as well as other subsidiaries of A-C. Included are patents that are not registered with A-C or anyone working for them, but the products of these patents may have been ones used by A-C.
- 9) Projects and Products: Specific information about large dam and nuclear projects on which A-C was the main contractor, as well as continued A-C misc. product information.
- 10) Histories: Compiled histories of Allis-Chalmers Corporation by various scholars. These are working copies of the histories, not the published versions.
- 11) Ledgers, Account Books, Sales Books: Various ledgers and books including payroll ledgers, employment ledgers, sales ledgers, construction books, order books, etc.
- 12) Audio/Visual: Recordings, film and slides on various topics
- 13) Oversize Items: Mostly posters and events sponsored by A-C. Some other various materials included as well.
- 14) Photographic: Photos arranged by subject or topic covering A-C manufacturing history.
- 15) Blueprints: Blueprints of products made by A-C as well as some blueprints of facilities of the company.

Administrative Info:

The collection came directly from the company in the early 1990s. The collection was processed by Steve Daily 1998-1999 and reworked in 2003.
