Abstract: Milwaukee's early transportation history has always been dominated by its geographic relationship to certain waterways. Milwaukee is situated where three rivers meet Lake Michigan. This geographic situation connected Milwaukee with the other major waterways in the upper Midwest: the Great Lakes (and St. Lawrence Seaway) and the Mississippi. This collection traces Milwaukee's association with these various waterways. It also includes numerous pamphlets associated with specific steamship companies that sailed the Great Lakes.

Access and Use: No restrictions

Language: English

Notes: Collection originally processed by Jeewon Schally, July 1993.
